

FURNITURE & FIXTURES VALUATION INSTRUCTIONS

The Furniture and Fixture Tables were designed to be used with the acquired costs of the property being assessed. Thus, if the business changes ownership, use the new owner's acquired price and acquired year. It is best to ask the taxpayer to break down his cost into the various categories so that the taxpayer can be afforded the greatest amount of depreciation.

If the taxpayer cannot breakdown the acquired cost, you should use the Table 8 depreciation.

Example #1: The taxpayer owns a small grocery store and turns in a copy of his depreciation schedule with a signed copy of the reporting form. The schedule says \$10,000 worth of furniture and fixtures were bought in 2003. There is no breakdown of property.

$$\begin{aligned} \$10,000 \times 72\% &= \$7,200 \text{ market value} \\ \$7,200 \times 3\% &= \$216 \text{ taxable value} \end{aligned}$$

Example #2: The taxpayer recently bought an auto-repair shop. The copy of his federal depreciation table reads as follows:

| <u>Year Purchased</u> | <u>Description</u> | <u>Cost</u> |
|------------------------------|------------------------------|--------------------|
| 1999 | Hand-Held Tools (Exempt) | \$6,000 |
| 2003 | Non-Hand-Held Tools & Equip. | \$3,000 |
| 2004 | Non-Hand-Held Tools & Equip. | \$2,500 |

Thus, your valuations would be:

$$\begin{aligned} 3,000 \times 71\% &= \$2,130 \\ 2,500 \times 80\% &= \underline{2,000} \\ &4,130 \text{ market value} \\ &4,130 \times 3\% = 124 \text{ taxable value} \end{aligned}$$

Example #3: The taxpayer recently bought a hardware store. She purchased the furniture and fixtures for a lump sum of \$75,000 in 2002. The old owner bought the same furniture and fixtures in 1985 for \$30,000.

$$\begin{aligned} \$75,000 \times 63\% &= \$47,250 \text{ market value} \\ \$47,250 \times 3\% &= \$1,418 \text{ taxable value} \end{aligned}$$
